

Material Skip Bucket

Skylift Material Skip Bucket with crane lugs for attaching a 4-leg crane sling. The Material Skip Bucket is stack-able, heavy-duty and cost effective. It has plenty of capacity to handle any kind of trash or bulk materials. It is constructed of heavy steel and reinforced at all stress points to ensure long useful life. It is designed to be hoisted with a set of 10 ft. or longer cable or strap slings. The sloped end makes it safe and easy to discharge the load. Skylift Material Skip Bucket is designed and manufactured according to the BS EN ISO 10855, LOLER international standards.
